PROFESSIONAL SUMMARY

Senior Site Reliability Engineer with 15+ years experience maintaining 99.9% uptime for revenue-critical applications across banking, insurance, and telecom platforms. Proven track record of reducing deployment times by 60%, preventing millions in downtime costs, and automating processes that eliminate 95% of manual interventions. Performed 1000+ production deployment, handled 150+ major incidents and completed 100+ process improvements. Expert in AWS cloud architecture, monitoring systems, and infrastructure automation for regulated industries.

CORE COMPETENCIES

Cloud & Infrastructure: AWS, Linux, Windows Server, Docker, Jenkins, Git, Bitbucket, CICD

Monitoring & Alerting: Splunk, Dynatrace, Appdynamics, CloudWatch, ELK Stack, Pingdom, PagerDuty

Automation & Scripting: Python, Bash, PowerShell, CloudFormation

PROFESSIONAL EXPERIENCE

Site Reliability Engineer (Contractor) | BMO | Nov 2025 - Present

Managing AWS serverless integrations for BMO applications impacting 13M+ customers

- Sole **SRE owner** for BMO's **New Cards product launch**, building end to end environment checks and monitoring solution using **Dynatrace, ELK, and AWS CloudWatch**
- Improved incident detection and resolution from **~3 incidents/week to ~2 incidents/day** by enabling proactive observability and partnering with **5+ channel teams** during multiphase testing.
- **Reduced alert fatigue by 60%** through finetuning Dynatrace and CloudWatch alerts aligned with SLOs and business critical metrics. Built **WCCS style dashboards** which displays both organization level and transaction level monitoring for all components.
- Developed an **internal web based tool** to track and display **AWS certificate expiry**, proactively preventing outages and dependency on security team emails.

Senior Site Reliability Engineer | Freedom Mobile Inc. | Oct 2022 – Nov 2025

Managing AWS cloud infrastructure for digital and enterprise applications serving 2M+ customers

- **Reduced incident response time by 75%** through custom AWS alarm dashboard displaying real-time system health across 50+ critical services
- **Eliminated 8 hours of weekly manual work** by automating certificate renewal processes using Jenkins pipelines, preventing potential service disruptions
- **Decreased deployment failures by 85%** through CloudFormation automation scripts for CloudWatch alarm provisioning across multiple AWS resources
- **Accelerated developer productivity by 40%** by implementing Docker containerization for login repositories with local deployment capabilities.

Senior Infrastructure Analyst | CAA Club Group | Oct 2019 – Oct 2022

Supporting digital transformation initiatives for 6M+ CAA members across insurance and web platforms

- **Reduced alert fatigue by 60%** through intelligent monitoring configurations using SCOM, PagerDuty, and Dynatrace across 100+ critical services
 - **Improved deployment success rate to 98%** by implementing comprehensive UAT testing protocols and representing technical team in 200+ release meetings
 - **Automated 90% of routine maintenance tasks** using Jenkins, Python, and PowerShell, freeing 15 hours weekly for strategic initiatives
 - **Prevented major outages** by proactively managing DR environments and ensuring ITIL compliance.
-

Deputy Manager | IDFC First Bank | Sept 2018 – Jun 2019

Led application reliability for Java-based collection systems handling ₹50+ crore portfolio

- **Increased collection efficiency by 25%** through strategic integration of Capital First and IDFC bank collection applications using agile methodology
 - **Improved call center productivity by 35%** by implementing allocation logic in Tallyman system
 - **Reduced integration timeline by 50%** for new call center dialer system using REST API connectivity with Tallyman application
 - **Enhanced decision-making speed** by delivering performance analysis dashboards to C-level executives using Oracle/SQL queries and data visualization
-

Senior Systems Engineer | ICICI Bank (via Vara United) | Feb 2018 – Sept 2018

Managed enterprise banking applications serving millions of retail customers

- **Reduced deployment time by 70%** through IBM UrbanCode automation for application deployments.
 - **Prevented revenue loss** by implementing proactive monitoring using Appnomics, Appdynamics, and Dynatrace across mission-critical banking infrastructure
-

Deputy Manager | HDFC Bank | Oct 2014 – Feb 2018

Responsible for card application infrastructure supporting 15M+ active cardholders

Database Administrator | Citi Group (via Wipro Technologies) | Sept 2010 – Oct 2014

24x7 production support for critical database servers in global warehousing and distribution

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate**
 - **Microsoft Certified: Azure Fundamentals**
 - **Oracle Database 10g Administrator Certified Professional**
-

EDUCATION

Master of Computer Applications | Mumbai University | 2013

Bachelor of Science in Information Technology | Mumbai University | 2009
