TECHNICAL SKILLS

Databases: SQL Server, Oracle, DynamoDb

Monitoring Tools: Splunk, ELK Kibana, Appnomics, Appdynamics, Dynatrace, SCOM, Cloudwatch

Middleware: Mulesoft, Weblogic, Websphere, IBM MQ, JBoss, Jrun, Apache Tomcat

Programming/ Scripting Languages: Python, Bash, Power shell, HTML, CSS, Java script

Infrastructure as Code (IaC): AWS CloudFormation, AWS CDK

Operating Systems: Windows Server, Linux, AIX, Sun Solaris

Devops: Jenkins, Git, Github, Bitbucket, Jfrog, TFS, Docker

Network: Firewall rule configuration, Socket, LAN, TCP, FTP, Secured FTP

Ticketing Tools: Service Now, Jira, BMC Helix, Confluence, Cherwell

RELEVANT PROFESSIONAL WORK EXPERIENCE

Senior Analyst Freedom Mobile Inc.

Oct 2022 – Till date

- Handled digital and enterprise applications hosted on AWS cloud
- Built an internal site from scratch for AWS alarms dashboard that displays last 24 hours triggered alarms. Automation completed on same site to disable alarms during scheduled downtime.
- Completed automation for certificate renewal on AWS using Jenkins.
- Developed cloudformation script to create cloudwatch alarms for multiple resources.
- Implemented a docker containerized environment for the login repository. Created a Compose file to enable developers to spin up containers locally.
- Enhance the deployment script with options for verbose logging to aid debugging across multiple repositories, and local package deployment to accelerate delivery by allowing direct deployment from local machines to AWS, bypassing the full lifecycle.

Senior Analyst CAA Club Group

Oct 2019 – Oct 2022

- Handled CAA web, integration and insurance applications maintenance, customization, capacity upgrades, vendor management, and security assessment
- Provided L2/L3 application support and managed Devops activities as part of the Digital & Integrations team.
- Resolved highly complex, multi-faceted problems to meet business needs and recommended the designs and methodologies for better system solutions.
- Worked with multiple technologies, including Jenkins, Git, TFS, NodeJS, React, Java, .net, IIS, network protocols, firewalls, windows and linux servers
- Configured and handled alert management using SCOM, Pagerduty, ELK and Dynatrace
- Ensured all works were carried out and documented in accordance with required standards, methods and procedures as per the ITIL process
- Ensured any change being moved into production was successfully tested in UAT and represented the team in release meetings
- Performed automation of scheduled tasks using Jenkins, Python, ControlM and Powershell
- Built & Upgraded DR environment for applications under Purview

Deputy Manager, IDFC First Bank

Sept 2018 – Jun 2019

- Performed maintenance and co-ordination of projects for Java based IDFC collection applications
- Extracted data by executing queries on Oracle & SQL server databases and presented performance analysis using Sas, MS Access and MS excel to the senior management.

- Received appreciation for integration of all collections applications between Capital First Ltd. And IDFC bank using agile methodology
- Participated in design discussions of any component and data architecture, performance monitoring and product evaluation for new products presented to the bank.
- Coordinated with multiple offshore teams for successfully upgrading Encollect platform.
- Integrated new call center dialer system with Tallyman application using Rest API
- Strategized and implemented multiple allocation logic in Tallyman which resulted in improvement of overall productivity of call center teams

Senior Associate (ICICI Bank), Vara United

Feb 2018 – Sept 2018

- Handled full systems life cycle of ICICI bank applications and managed designing, deployment, testing, implementation and support using Weblogic and Jboss middleware application.
- Performed monitoring and alert configurations using Appnomics, Appdynamics and Dynatrace
- Automated deployment and service restart process for applications using IBM urban code.

Deputy Manager, HDFC Bank

Oct 2014 – Feb 2018

- Handled HDFC bank card application maintenance, customization, capacity upgrades, vendor management, and security assessment
- Resolved highly complex, multi-faceted problems to meet business needs and recommended the designs and methodologies for better system solutions.
- Worked with multiple technologies, including Oracle, MS SQLserver, Java, .net, HTML, Java Script, Microservices, Weblogic, Jboss, IIS, network protocols, firewalls, windows and linux servers
- Configured and handled alert management using Appnomics and Dynatrace
- Ensured all works were carried out and documented in accordance with required standards, methods and procedures as per the ITIL process using Service now
- Ensured any change being moved into production was successfully tested in UAT and represented to the team in release meetings
- Performed automation of scheduled tasks using IBM urban code and Autosys
- Successfully conducted Standby and DR drill for DCMS and DCRS application

Project Engineer (Citi Group), Wipro Technologies

Sept 2010 – Oct 2014

- Handled production support for critical database servers in a 24x7 environment using ticketing tools - Service now, Mantis and Jira for multiple warehousing and distribution environment
- Deployed Oracle, Sybase & SQL packages on the respective test and production environments

CERTIFICATIONS

- AWS Certified Solution Architect – Associate
- Microsoft Certified: Azure Fundamentals
- Oracle Database 10g Administrator Certified Professional - Version Retired

EDUCATION**Masters of Computer Applications, Mumbai University (2013)**

- Equivalent to Canadian Master's Degree – Evaluated by WES

Bachelor of Science in Information Technology, Mumbai University (2009)

- Equivalent to Canadian Bachelor's Degree – Evaluated by WES
